Problem 4

Problem 1. $\forall L \in \texttt{NatList}, \mathrm{rev}(\mathrm{rev}(L)) = L$.

Proof. By structural induction on L.

(1) Base case

What to show: $\mathrm{rev}(\mathrm{rev}(nil)) = nil$.

$$\begin{aligned} \mathrm{rev}(\underline{\mathrm{rev}(nil)}) &\longrightarrow \underline{\mathrm{rev}(nil)} && \text{(by rev1)} \\ &\longrightarrow nil && \text{(by rev1)} \end{aligned}$$

(2) Induction case

What to show: $\mathrm{rev}(\mathrm{rev}(x \mid l)) = x \mid l$

Induction hypothesis: $\mathrm{rev}(\mathrm{rev}(l)) = l$

where $x \in \texttt{PNat}$ and $l \in \texttt{NatList}$.

$$\begin{aligned} \mathrm{rev}(\underline{\mathrm{rev}(x \mid l)}) &\longrightarrow \underline{\mathrm{rev}(\mathrm{rev}(l) \mathbin{@} (x \mid nil))} && \text{(by rev2)} \\ &\longrightarrow \underline{\mathrm{rev}(x \mid nil)} \mathbin{@} \mathrm{rev}(\mathrm{rev}(l)) && \text{(by Lemma 1)} \\ &\longrightarrow (\underline{\mathrm{rev}(nil)} \mathbin{@} (x \mid nil)) \mathbin{@} \mathrm{rev}(\mathrm{rev}(l)) && \text{(by rev2)} \\ &\longrightarrow \underline{(nil \mathbin{@} (x \mid nil))} \mathbin{@} \mathrm{rev}(\mathrm{rev}(l)) && \text{(by rev1)} \\ &\longrightarrow \underline{(x \mid nil) \mathbin{@} \mathrm{rev}(\mathrm{rev}(l))} && \text{(by @1)} \\ &\longrightarrow x \mid (nil \mathbin{@} \mathrm{rev}(\mathrm{rev}(l))) && \text{(by @2)} \\ &\longrightarrow x \mid \underline{\mathrm{rev}(\mathrm{rev}(l))} && \text{(by @1)} \\ &\longrightarrow x \mid l && \text{(by IH)} \end{aligned}$$

□

Lemma 1. $\forall L1, L2 \in \texttt{NatList}, \mathrm{rev}(L1 \mathbin{@} L2) = \mathrm{rev}(L2) \mathbin{@} \mathrm{rev}(L1)$.

Proof. By structural induction on $L1$.

(1) Base case

What to show: $\mathrm{rev}(nil \mathbin{@} l2) = \mathrm{rev}(l2) \mathbin{@} \mathrm{rev}(nil)$.

$$\begin{aligned} \underline{\mathrm{rev}(nil \mathbin{@} l2)} &\longrightarrow \mathrm{rev}(l2) && \text{(by @1)} \\ \mathrm{rev}(l2) \mathbin{@} \underline{\mathrm{rev}(nil)} &\longrightarrow \underline{\mathrm{rev}(l2) \mathbin{@} nil} && \text{(by rev1)} \\ &\longrightarrow \mathrm{rev}(l2) && \text{(by Lemma 2)} \end{aligned}$$

(2) Induction case

What to show: $\mathrm{rev}((x \mid l1) \mathbin{@} l2) = \mathrm{rev}(l2) \mathbin{@} \mathrm{rev}(x \mid l1)$
Induction hypothesis: $\mathrm{rev}(l1 \mathbin{@} l2) = \mathrm{rev}(l2) \mathbin{@} \mathrm{rev}(l1)$
where $x \in \texttt{PNat}$, and $l1, l2 \in \texttt{NatList}$.

$$\begin{aligned}
\mathrm{rev}(\underline{(x \mid l1) \mathbin{@} l2}) &\longrightarrow \underline{\mathrm{rev}(x \mid (l1 \mathbin{@} l2))} && \text{(by @2)} \\
&\longrightarrow \underline{\mathrm{rev}(l1 \mathbin{@} l2)} \mathbin{@} (x \mid nil) && \text{(by rev2)} \\
&\longrightarrow \underline{(\mathrm{rev}(l2) \mathbin{@} \mathrm{rev}(l1)) \mathbin{@} (x \mid nil)} && \text{(by IH)} \\
&\longrightarrow \mathrm{rev}(l2) \mathbin{@} (\mathrm{rev}(l1) \mathbin{@} (x \mid nil)) \\
& && \text{(by Lemma 2 in Problem 2)} \\
\mathrm{rev}(l2) \mathbin{@} \underline{\mathrm{rev}(x \mid l1)} &\longrightarrow \mathrm{rev}(l2) \mathbin{@} (\mathrm{rev}(l1) \mathbin{@} (x \mid nil)) && \text{(by rev2)}
\end{aligned}$$

□

Lemma 2. $\forall L \in \texttt{NatList}, L \mathbin{@} nil = L$.

Proof. By structural induction on L.

(1) Base case

What to show: $nil \mathbin{@} nil = nil$.

$$\underline{nil \mathbin{@} nil} \longrightarrow nil \qquad \text{(by @1)}$$

(2) Induction case

What to show: $(x \mid l) \mathbin{@} nil = x \mid l$
Induction hypothesis: $l \mathbin{@} nil = l$
where $x \in \texttt{PNat}$ and $l \in \texttt{NatList}$.

$$\begin{aligned}
\underline{(x \mid l) \mathbin{@} nil} &\longrightarrow x \mid \underline{(l \mathbin{@} nil)} && \text{(by @2)} \\
&\longrightarrow x \mid l && \text{(by IH)}
\end{aligned}$$
