

Problem 16

Problem 1. $\forall L \in \text{NatList}, \text{diff}(\text{rev}(L), L) = \text{nil}$.

Proof. By structural induction on L .

(1) Base case

What to show: $\text{diff}(\text{rev}(\text{nil}), \text{nil}) = \text{nil}$.

$$\begin{aligned} \text{diff}(\text{rev}(\text{nil}), \text{nil}) &\longrightarrow \text{diff}(\text{nil}, \text{nil}) && \text{(by rev1)} \\ &\longrightarrow \text{nil} && \text{(by diff1)} \end{aligned}$$

(2) Induction case

What to show: $\text{diff}(\text{rev}(x \mid l), x \mid l) = \text{nil}$

Induction hypothesis: $\text{diff}(\text{rev}(l), l) = \text{nil}$

where $x \in \text{PNat}$ and $l \in \text{NatList}$.

$$\begin{aligned} \text{diff}(\text{rev}(x \mid l), x \mid l) &\longrightarrow \text{diff}(\text{rev}(l) @ (x \mid l), x \mid l) && \text{(by rev2)} \\ &\longrightarrow \text{diff}(\text{rev}(l), x \mid l) @ \text{diff}(x \mid l, x \mid l) && \text{(by Problem 9 - Lemma 1)} \\ &\longrightarrow \text{diff}(\text{rev}(l), x \mid l) @ \text{nil} && \text{(by Problem 15)} \\ &\longrightarrow \text{diff}(\text{rev}(l), x \mid l) && \text{(by Problem 4 - Lemma 2)} \\ &\longrightarrow \text{drop}(\text{diff}(\text{rev}(l), l), x) && \text{(by Problem 14)} \\ &\longrightarrow \text{drop}(\text{nil}, x) && \text{(by IH)} \\ &\longrightarrow \text{nil} && \text{(by drop1)} \end{aligned}$$
