Problems

```
Problem 1. \forall L \in \text{NatList} : \text{fold} * (\text{rev}(L)) = \text{fold} * (L).
```

Problem 2. $\forall X \in PNat : rev(mkl1(X)) = mkl2(X)$.

Problem 3. $\forall X \in PNat: fact(X) = fold*(mkl2(X)).$

Problem 4. $\forall L \in \text{NatList} : \text{rev}(\text{rev}(L)) = L.$

Problem 5. $\forall L \in \text{NatList} : \text{size}(L) = \text{size}(\text{rev}(L)).$

Problem 6. $\forall X \in \mathtt{PNat}, \forall L \in \mathtt{NatList} : \mathrm{has}(L, X) = \mathrm{has}(\mathrm{rev}(L), X).$

Problem 7. $\forall L \in \text{NatList} : \text{diff}(L, \text{rev}(L)) = nil.$

Problem 8. $\forall L1, L2 \in \mathtt{NatList} : \mathrm{diff}(L1, L2) = \mathrm{diff}(L1, \mathrm{rev}(L2))$

Problem 9. $\forall L1, L2 \in \text{NatList}: \text{diff}(L1, L2) = \text{rev}(\text{diff}(\text{rev}(L1), L2)).$

Problem 10. $\forall X \in PNat, \forall L \in NatList: drop(L, X) = rev(drop(rev(L), X)).$

Problem 11. $\forall X \in PNat, \forall L \in NatList: has(drop(L, X), X) = false.$

Problem 12. $\forall L \in \text{NatList} : \text{sum}(L) = \text{sum}(\text{rev}(L)).$

Problem 13. $\forall X \in PNat, \forall L \in NatList: count(L, X) = count(rev(L), X).$

Problem 14. $\forall X \in PNat, \forall L1, L2 \in NatList: diff(L1, X \mid L2) = drop(diff(L1, L2), X).$

Problem 15. $\forall L \in \text{NatList} : \text{diff}(L, L) = nil.$

Problem 16. $\forall L \in \text{NatList}: \text{diff}(\text{rev}(L), L) = nil.$

Problem 17. $\forall L \in \text{NatList}: \text{rmDup}(\text{rmDup}(L)) = \text{rmDup}(L).$

Problem 18. $\forall L1, L2 \in \mathtt{NatList} : \mathrm{rmDup}(L1 @ L2) = \mathrm{rmDup}(\mathrm{rmDup}(L1) @ \mathrm{rmDup}(L2)).$

Problem 19. $\forall L \in \text{NatList}: \text{setEqual}(L, \text{rmDup}(L)) = true.$

Problem 20. $\forall L \in \text{NatList}: \text{setEqual}(L, \text{rev}(L)) = true.$
